EDUCATION

New York University Abu Dhabi

B.S. Computer Science | Minors: Applied Mathematics, Economics | GPA: 3.954 / 4.0

Relevant Coursework: Algorithms, Data Structures, Operating Systems, Computer Networks, Machine Learning, Probability & Statistics

Abu Dhabi, UAE

Expected May 2027

PROFESSIONAL EXPERIENCE

Inception (G42)

Data Engineer Intern

Abu Dhabi, UAE

Jun 2026 - Aug 2026

- Developed 15+ **Model Context Protocol (MCP)** tools integrating **Microsoft Graph APIs** across Outlook, Teams, SharePoint and Planner, enabling large language model (LLM) agents to retrieve enterprise data and execute multi-step workflows.
- Built and tested **8 agentic AI workflows** (meeting preparation, email triage, task prioritization, enterprise information retrieval); also built Copilot Studio agents for sprint planning and HR scheduling.
- Evaluated **Arize Phoenix, RAGAS and DeepEval** for agent evaluation and contributed to a self-hosted observability pipeline (**Grafana Alloy, OpenTelemetry, PostgreSQL, Kubernetes**) for agent tracing and evaluation.

UNDP - AltFinLab

Intern, Digital, AI & Innovation Team (part-time)

Remote

Sep 2026 - Present

- Building reproducible AI tools and automations for hand-over to non-technical staff; selected via a pilot proposal for 20 food-security CSOs.

H-Farm - Open Innovation and H-Farm AI

Open Innovation Intern

Venice, Italy

Jun 2025 - Aug 2025

- Scouted and analyzed **100+ startups** in blockchain/tech ecosystems; synthesized findings into shortlists and internal briefs.
- Built **agent-based automation** (n8n) for research and profiling workflows, cutting manual screening time by ~30%.

Arrayah Venture Studio

Deep Tech Intern / Founder's Associate

Dubai, UAE

Jun 2024 - Aug 2024

- Conducted **20+ founder interviews**; helped build the mentor network, securing **15 mentors in 4 weeks**.
- Designed a pricing model and prototype concept for an energy-efficient code refactoring platform.

RESEARCH

Green AI Research - with Prof. João Paulo Fernandes

Research Collaborator

NYU Abu Dhabi

Dec 2024 - May 2026

- Contributed to a position paper on the environmental and computational implications of AI systems (ICSE 2026 workshop context); attended the related workshop in Lausanne. Papers: [Greening AI with Software Engineering](#) (workshop), [GREENS'26](#).
- Explored evaluation of AI coding agents and software energy optimization (early LangChain and SWE-bench experiments).

REACH Lab / SMART Construction Research Group

Student Research Assistant - Robotics (LLM + System Integration track)

NYU Abu Dhabi

Sep 2026 - Present

- Robotics project with KINESIS and AD Ports; supporting competition operations and ramping up on the robot stack and ROS.

PROJECTS

Energy Benchmarking for LLM APIs - Python, APIs, Profiling [\[GitHub\]](#)

- Built APIs to query LLMs (e.g., GPT-4) and ran repeatable performance/energy benchmarks comparing models and workflows.

Chess Style Embeddings - Python, PyTorch, Representation Learning [\[GitHub\]](#)

- Embedded post-opening move sequences for similarity search using a CNN/Transformer-style model over board-threat features.

Interactive Octopus (Robotics) - Sensors, Embedded/Control [\[GitHub\]](#)

- Built a sensor-driven robot car that reacts to obstacles and interaction.

Award: 1st place, Startup Center bootcamp (Jul 2025) - prototyped CogniCare, an AI voice-assistant wearable for dementia care.

LEADERSHIP & TEACHING

NYU Abu Dhabi

CS Peer Tutor, Academic Resource Center

Abu Dhabi, UAE

Sep 2026 - Present

Teaching Assistant, Computer Programming for Engineers - C++ recitations for 20+ students

Aug 2024 - Dec 2024

HackAD (Student SIG), NYU Abu Dhabi

Vice President & Events Manager

Jan 2023 - Dec 2024

- Organized 7+ technical events, including a **100+ participant hackathon** and "ML for All" workshops.

SKILLS

Programming Languages: Python, C++, C, Java, JavaScript, SQL

AI / Machine Learning: PyTorch, TensorFlow, LangChain, LLM Agents, MCP, Microsoft Graph API, NumPy, Pandas

Cloud & DevOps: Kubernetes, Docker, Linux, Git, Azure DevOps, Node.js; **Databases:** PostgreSQL, MongoDB

LLM Evaluation & Observability: Arize Phoenix, RAGAS, DeepEval, OpenTelemetry, Grafana Alloy
