EDUCATION

New York University Abu Dhabi — **Abu Dhabi, UAE**
B.S. Computer Science | Minors: Applied Mathematics, Economics | GPA: 3.954 / 4.0 — ***Expected May 2027***
Relevant Coursework: Algorithms, Data Structures, Operating Systems, Computer Networks, Machine Learning, Probability & Statistics

PROFESSIONAL EXPERIENCE

Inception (G42) — **Abu Dhabi, UAE**
Data Engineer Intern — ***Jun 2026 - Aug 2026***
- Developed **15+ Model Context Protocol (MCP) tools** integrating **Microsoft Graph APIs** across Outlook, Teams, SharePoint and Planner, enabling large language model (LLM) agents to retrieve enterprise data and execute multi-step workflows.
- Built and tested **8 agentic AI workflows** (meeting preparation, email triage, task prioritization, enterprise information retrieval); also built Copilot Studio agents for sprint planning and HR scheduling.
- Evaluated **Arize Phoenix, RAGAS and DeepEval** for agent evaluation and contributed to a self-hosted observability pipeline (**Grafana Alloy, OpenTelemetry, PostgreSQL, Kubernetes**) for agent tracing and evaluation.

UNDP - AltFinLab, Istanbul Regional Hub — **Remote (Istanbul)**
Intern, Digital, AI & Innovation Team (part-time) — ***Sep 2026 - Present***
- Building reproducible AI tools and automations, including automated outreach, that non-technical staff can take over.
- Researching companies and running outreach, including to teams across UNDP, for a **blockchain accelerator**.

H-Farm - Open Innovation and H-Farm AI — **Venice, Italy**
Open Innovation Intern — ***Jun 2025 - Aug 2025***
- Scouted and analyzed **100+ startups** in blockchain/tech ecosystems; synthesized findings into shortlists and internal briefs.
- Built **agent-based automation** (n8n) for research and profiling workflows, cutting manual screening time by **~30%**.

Arrayah Venture Studio — **Dubai, UAE**
Deep Tech Intern / Founder's Associate — ***Jun 2024 - Aug 2024***
- Conducted **20+ founder interviews**; helped build the mentor network, securing **15 mentors in 4 weeks**.
- Designed a pricing model and prototype concept for an energy-efficient code refactoring platform.

RESEARCH

Green AI Research - with Prof. João Paulo Fernandes — **NYU Abu Dhabi**
Research Collaborator — ***Dec 2024 - May 2026***
- Second author, Transpiling with LLMs for Energy Efficiency (**GREENS '26**, ACM; ICSE 2026 workshop, Rio de Janeiro): GPT-5-transpiled C++ kept **87%** of LeetCode solutions correct and cut runtime and energy use by **~97%** vs. Python.
- Co-author, Greening AI-enabled Systems with Software Engineering, a research agenda from the CECAM-Lorentz workshop in Lausanne (Feb 2025), which I attended.
- Explored evaluation of AI coding agents and software energy optimization (early LangChain and SWE-bench experiments).

REACH Lab / SMART Construction Research Group — **NYU Abu Dhabi**
Student Research Assistant - Robotics (LLM + System Integration track) — ***Sep 2026 - Oct 2026***
- Helped organize a robotics competition for **AD Ports** employees operating **Unitree Go2W** robots on logistics tasks; built a control panel/UI for the Go2W. Project paused when AD Ports put the competition on hold.

PROJECTS

Energy Benchmarking for LLM APIs - ***Python, APIs, Profiling*** **[GitHub]**
- Built APIs to query LLMs (e.g., GPT-4) and ran repeatable performance/energy benchmarks comparing models and workflows.

Chess Style Embeddings - ***Python, PyTorch, Representation Learning*** **[GitHub]**
- Embedded post-opening move sequences for similarity search using a CNN/Transformer-style model over board-threat features.

Interactive Octopus (Robotics) - ***Sensors, Embedded/Control*** **[GitHub]**
- Built a sensor-driven robot car that reacts to obstacles and interaction.

Award: 1st place, Startup Center bootcamp (Jul 2025) - prototyped CogniCare, an AI voice-assistant wearable for dementia care.

LEADERSHIP & TEACHING

NYU Abu Dhabi — **Abu Dhabi, UAE**
CS Peer Tutor, Academic Resource Center — ***Sep 2026 - Present***
Teaching Assistant, Computer Programming for Engineers - C++ recitations for 20+ students — ***Aug 2024 - Dec 2024***

HackAD (Student SIG), NYU Abu Dhabi
Vice President & Events Manager — ***Jan 2023 - Dec 2024***
- Organized 7+ technical events, including a **100+ participant hackathon** and "ML for All" workshops.

SKILLS

Programming Languages: Python, C++, C, Java, JavaScript, SQL
AI / Machine Learning: PyTorch, TensorFlow, LangChain, LLM Agents, MCP, Microsoft Graph API, NumPy, Pandas
Cloud & DevOps: Kubernetes, Docker, Linux, Git, Azure DevOps, Node.js; **Databases:** PostgreSQL, MongoDB
LLM Evaluation & Observability: Arize Phoenix, RAGAS, DeepEval, OpenTelemetry, Grafana Alloy
